

The journey to reading begins with phonemic awareness.

65%

of 4th graders and 66% of 8th graders are reading below a proficient level, according to 2019 NAEP scores.

95%

of elementary students are capable of learning to read when they receive sufficient instruction on foundational reading skills.

What is Phonemic Awareness?

Phonemic awareness is the ability to understand that spoken words are made up of individual sounds called phonemes, and it's one of the best early predictors for reading success.

“

Every point in a child's development of word-level reading is substantially affected by phonological awareness skills, from learning letter names all the way up to efficiently adding new, multisyllabic words to the sight vocabulary.

David Kilpatrick, 2015

The Curriculum

True progress in just 10-12 minutes a day

Each level of the Heggerty Phonemic Awareness Curriculum provides 35 weeks of daily lessons, focusing on eight phonemic awareness skills, along with two additional activities to develop letter and sound recognition, and language awareness. Lessons are designed for a classroom setting, and only take 10-12 minutes.

Easy to Implement

Lessons are easy to follow, include teacher direction for each skill, and require minimal prep time.

Fast Paced and Engaging

10-12 minute daily lessons are the perfect combination of focus and fun for your classroom.

Cost Effective

Since phonemic awareness is an auditory skill, there are no student materials to purchase.

When you look for programs out there, there are hundreds of phonics programs but very few phonemic awareness programs that take students from the simplest to advanced forms. Heggerty has come out with a comprehensive and systematic way to do that. It follows an excellent scope and sequence. It develops all of the skills they need to know. No one does it as systematically as Heggerty.

Russell Washington, School District of Philadelphia

We serve over 7,250 districts across the U.S.
